<b>REISSUE APPLICATION DECLARATION BY THE ASSIGNEE</b>		Docket Number (optional) 033558.0010.REI(0133)
I hereby declare that: My residence and mailing address and citizenship are stated below next to my name. I am authorized to act on behalf of the following assignee: <u>Capstone Turbine Corporation</u> and the title of my position with said assignee is: <u>Vice President and General Counsel</u> The entire title to the patent identified below is vested in said assignee.		
Name of Patentee(s): <u>Everett R. Geis, Brian W. Peticolas, Joel B. Wacknov</u>		
Patent Number <u>6,031,294</u>	Date of Patent Issued <u>February 29, 2000</u>	
Title of Invention <u>TURBOGENERATOR/MOTOR CONTROLLER WITH ANCILLARY ENERGY STORAGE/DISCHARGE</u>		
I believe said patentee(s) to be the original, first and sole/joint inventor(s) of the subject matter which is described and claimed in said patent, for which a reissue patent is sought on the invention entitled <u>TURBOGENERATOR/MOTOR CONTROLLER WITH ANCILLARY ENERGY STORAGE/DISCHARGE</u> the specification of which <input type="checkbox"/> is attached hereto. <input checked="" type="checkbox"/> was filed on <u>December 31, 2001</u> as reissue application number <u>10/ 039,819</u> and was amended on _____ (If applicable) I have reviewed and understand the contents of the above identified specification, including the claims, as amended by any amendment referred to above. I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56. I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.) <input type="checkbox"/> by reason of a defective specification or drawing. <input checked="" type="checkbox"/> by reason of the patentee claiming more or less than he had the right to claim in the patent. <input type="checkbox"/> by reason of other errors. At least one error upon which reissue is based is described as follows: <u>The full scope of available claims was not captured in the claims as allowed.</u> The issued patent claims methods of controlling a permanent magnet turbogenerator/motor that include, generally, providing utility electrical power to the permanent magnet turbogenerator/motor through a pulse width modulated inverter to start the permanent magnet turbogenerator/motor. New claims 24-48 have been submitted in addition to the original claims that do not include elements in the original claims. For example, new claims 24-48 do not comprise "providing utility electrical power to the permanent magnet turbogenerator/motor ... to start the permanent magnet turbogenerator/motor" as found in independent original claims 1, 2, 3, 5, 10, 14 and 15. All errors corrected in this reissue application arose without any deceptive intention on the part of the applicant.
